

## QUALITY POLICY

Alliance Marine Services' (AMS) policy is to provide customized, safe, cost effective and efficient marine support services to the offshore and shipping industries. This will be achieved by conducting operations within a planned, coordinated and organized framework that is facilitated by our Business Management System (BMS).

The BMS is implemented and maintained with the goal of achieving optimum utilization of the resources and experience of AMS staff in order to satisfy customer needs and expectations while continuously improving our business and services.
